

PP[▼] Files

Railex™ PP Files are specially designed for the storage of cutting foils and PCB templates.

The transparent polypropylene hanging files are available in sizes from A4 to 622x746mm. The files are anti-static, rip-resistant and environmentally friendly. They are also ideal for use in clean rooms. Each file has a dust-excluding flap with two hook-and-loop fasteners. Label holders are available as an optional extra. PP Files are available in 6 standard sizes and we recommend storing no more than 80 PP Files per Quickrack rail.

Specification

- The files are anti-static
- Manufactured from 500 micron thick polypropylene
- Transparent
- RIP-resistant and environmentally friendly
- Perfect for clean rooms
- Each file has an integral dust-cover flap and two hook-and-loop closers

DESIGNED AND MADE IN BRITAIN

PD[✓] Hook-on Files

These sturdy Railex™ PD Files are ideal for a variety of contents such as films, wraps and print plates. They are equally useful for storing proofs and first-off samples.

They hang on rails by way of two or four sturdy Railex™ hooks, depending on size. Millions of these files are in daily use around the world. The file itself is manufactured from 380 micron presspahn, and has a 25mm storage capacity. PD files are available in 15 standard sizes, and we recommend storing no more than 50 PD Files per Quickrack rail.

FM[✓] Hook-on Files

The board used in Railex™ FM Files is painted white on one side, giving the file a pH-neutral inner, making it ideal to store and protect valuable sheets of film or flexo plates.

Flexible label holders are included, and labels are available in seven different colours. FM Files are available in 6 standard sizes and we recommend storing no more than 80 FM Files per Quickrack rail.

Quickrack[✓] Storage System

The Railex™ Quickrack storage system is unique. With easy, fast assembly and made of strong, steel extrusions, the racks can support between 800kgs and 1000kgs of Railex™ hook-on files complete with contents.

Available in a choice of two colour combinations: blue/orange or grey.

MiniQuickrack[✓] Storage System

The Railex™ MiniQuickrack is available with a height of 970mm and with 2 different depths of 470 and 625mm. It also includes your choice of one or two rails and a melamine working board.

Available in a choice of two colour combinations: blue/orange or grey.
