Quickcrack[™] & MiniQuickcrack[™] Storage Systems

The Railex[™] Quickcrack storage system is unique. With easy, fast assembly and made of strong, steel extrusions, the racks can support between 800kgs and 1000kgs of Railex[™] hook-on files complete with contents.

Each Railex[™] Quickcrack set comes complete with rails for hanging the pockets. Choose from 3 file pocket styles.

PD[™] Hook-on Files

These sturdy Railex[™] PD Files are ideal for a variety of contents such as films, wraps and print plates. They are equally useful for storing proofs and first-off samples.

FM[™] Hook-on Files

The board used in Railex[™] FM Files is painted white on one side, giving the file a pH-neutral inner, making it ideal to store and protect valuable sheets of film or flexo plates.

PP[™] Hook-on Files

Railex[™] PP transparent polypropylene hanging files are specially designed for the storage of cutting foils and PCB templates.
